## **PRELIMINARY REMARKS**

This is the *fourth* report in the bankruptcy of Abengoa Bioenergy Netherlands B.V. (hereinafter 'ABEN').

This report is based on information that the bankruptcy trustee received from the company and third parties. No guarantees are given concerning the accuracy and completeness of the data included. It is possible that figures or other data may at a later stage turn out to deviate from the content of this report.

No rights may be derived from this bankruptcy report and/or following reports.

## **INTRODUCTION**

08/06/16: ABEN is part of the Abengoa group, a Spanish multinational with its head office in Sevilla. See [www.abengoa.com](http://www.abengoa.com). Abengoa S.A. and a number of other Spanish group companies have been involved in Spanish pre-insolvency proceedings since 25 November 2015 pursuant to Article 5a of the Spanish Insolvency Act.

The Abengoa group has five factories in Europe producing bio ethanol: three in Spain, one in France and one in the Netherlands (Rotterdam, Europoort). The factory in Rotterdam is the largest of these five factories; of the 1,279 million litres of bio ethanol produced in total in Europe, 480 million litres are produced in Rotterdam. The factory covers 23 hectares.

The factory concerns a so-called 'first generation' factory. In other words, it produces bio ethanol from food commodities such as grain and corn. ABEN sells this bio ethanol to oil companies, who mix it with fossil fuels.

ABEN converts the waste product of the bio ethanol production into animal feed (so-called DDGS) and sells it to farms and trading houses. The CO<sub>2</sub> released in the production of bio ethanol and the electricity created in the process are also sold.

## **PERIOD OF SUSPENSION OF PAYMENTS**

08/06/16: On 26 April 2016, the Amsterdam District Court granted a provisional suspension of payments to ABEN, appointing *meester* V.M. de Winkel as supervisory judge and the

undersigned as administrator. In addition, it ruled that the Rotterdam District Court perform all duties which have been entrusted to the district court by law and it proclaimed a cooling-off period.

A study by the administrator has shown that there was no prospect of satisfying ABEN's creditors as referred to in Article 242(1) under 5 of the Bankruptcy Act. For this reason, the administrator requested the district court to have ABEN's provisional suspension of payments withdrawn and, if the district court saw reason thereto, to have ABEN, which met the criteria laid down in Article 1 of the Bankruptcy Act, officially declared bankrupt. The district court proceeded to do so on 11 May 2016. In addition, it proclaimed a cooling-off period of two months.

#### **PERIOD OF BANKRUPTCY**

08/06/16: At the start of the bankruptcy, the half-product still present in the production process was processed. Subsequently, the production process was shut down in a responsible manner pending a restart. The factory was kept running due to all kinds of process-specific circumstances that make it undesirable to (also) shut down the factory.

A number of important parties on the market have presented themselves for acquisition of the factory. These parties have received an information memorandum and access to a database, after which a number of prospective buyers have made an initial offer. Almost all parties had already obtained information on the sales process that the Spanish parent company had set up for the entire bio ethanol branch.

The bankruptcy trustee is currently negotiating with the two most suitable prospects. These are the parties that made the highest offers and that offer the best safeguards for a quick transaction and restart. The intention is to conclude an agreement with one of them in the near future. A transaction will depend on, among other things, the permission of the competition authorities in different countries and the cooperation of all kinds of parties involved in ABEN. In this context, meetings are held with the leasehold landlord Havenbedrijf Rotterdam, the Environmental Department of Rijnmond (DCMR), the Labour Inspectorate and the most important partners, suppliers and customers.

In order to keep the factory running until the takeover, to preserve the value of the factory and to comply with the applicable laws and regulations, considerable costs must be incurred by

the bankrupt estate. These might include the costs of security, compliance, inspection, expertise, IT, maintenance, repairs and staff. The bankruptcy trustee strives to limit the costs and the period in which these are incurred as much as possible.

22/09/16: The negotiations have been completed and with the permission of the supervisory judges, the bankruptcy trustee has sold the movable and immovable property and goodwill of the bankrupt company and supplied it to Alco Energy Rotterdam B.V. on 7 July 2016. See furthermore under 6 below.

The majority of the staff of the bankrupt company has entered the employment of Alco Energy Rotterdam B.V.
